"Refugees are mothers, fathers, sisters, brothers, children, with the same hopes and ambitions as us -- except that a twist of fate has bound their lives to a global refugee crisis on an unprecedented scale."

Khaled Hosseini

Monday: Quote

According to UNHCR, the UN's refugee agency, [21.5 million people](#) were forcibly displaced each year by weather-related events – floods, storms, wildfires and extreme temperatures – from 2008 to 2016. There could be 1.2 billion climate refugees by 2050. A collective effort is needed to solve the issue of climate migration and help the “world's forgotten victims” of climate change.
